

**Health** Live Long, stay healthy. Cellfood®, your foundation to good health!

## Is an apple a day good enough?

Unfortunately, an apple day is not enough to protect us from free radicals.

Exercise, pollution, stress, food additives, pesticides, smoking, excess alcohol consumption, chemical substances, sunlight and radiation all expose us to free radicals, causing oxidative stress to the body and possibly contributing to over 60 conditions, including:

- increased ageing of bones, organs, brain and skin
- interference with cell replication
- malignant tissue formation
- enzyme malfunction
- atherosclerosis and heart disease

### Cellfood® is a powerful antioxidant

Antioxidants scavenge free radicals, helping to slow down the ageing process and assists in preventing a variety of age-related diseases.

An oxygen mineral supplement, **Cellfood®**:

- Boosts the immune system, restricting free radical damage
- Assists the body in producing glutathione, a powerful antioxidant
- Provides essential nutrients like selenium and amino acids at cellular level

### Cellfood® SKINCARE – the anti-ageing gel

The absorption rate of a product by the skin's cells are determined by particle size, pH balance, and bio-electrical charge. **Cellfood® SKINCARE** complies with all three criteria. This phenomenal anti-ageing gel contains **Cellfood®** which, over-and-above its normal functions listed above, also facilitates the delivery of additional skincare nutrients such as Aloe Vera, glycerine, chamomile and fossilized organics to the skin's cells.

**Recommend Cellfood® to assist in delaying pre-mature ageing of the skin from the inside and Cellfood® SKINCARE to achieve the same from the outside.**

**It's as easy as eating an apple a day!**
