

### What is Cell-Pet™?

**Cell-Pet™** is a liquid, highly-concentrated, super-energized, colloidal mineral and nutritional supplement, which you add to the drinking water of your Pet on a daily basis, in order to maintain its peak performance and general well-being.

### What are the Benefits of using Cell-Pet™?

As a dynamic multi-action agent, **Cell-Pet™** is environmentally and ecologically safe for all types of pets. It has no detrimental side-effects, and has numerous benefits for your Pet:

- ◆ Enhances vitality and energy
- ◆ Reduces lethargy or distress
- ◆ Reduces unbalanced hyperactivity
- ◆ Protects against diseases
- ◆ Enhances optimal bodily functions
- ◆ Strengthens systems, e.g. immune system
- ◆ Balances body mass
- ◆ Improves digestion
- ◆ Enhances texture and sheen of coat
- ◆ Promotes peak performance
- ◆ Maintains general well-being

### What are other reasons for using Cell-Pet™?

- ◆ Works fast and effectively
- ◆ Is cost-effective and easy to use
- ◆ Achieves sustainable results

**Today**, increasing environmental pollution and fluctuations in the quality of food and drinking water are making our pets more susceptible than ever to distress and disease. Deficiencies of Oxygen and Minerals lead to accumulation of metabolic waste and toxins in bodily systems, creating a breeding ground for harmful bacteria, viruses and pathogens.

Therefore, the amazing supplement, **Cell-Pet™**, should be given to your Pet every day, for enhancing its nutritional biochemical activities and enabling it to function optimally.

### How does Cell-Pet™ achieve results?

**Cell-Pet™** achieves results in a unique and amazing manner by supplying your Pet with essential nutrients, elements and minerals, as well as nascent oxygen and hydrogen (due to the *splitting of water molecules* inside your Pet), all in a controlled manner and at cellular level, where it is most needed.

As soon as your Pet drinks water with **Cell-Pet™** in it, **Cell-Pet™** starts working in its most amazing and unique manner, on the physical, electromagnetic, chemical and biological levels of your Pet.

#### Physical and Electromagnetic Levels:

**Cell-Pet™** supplies your Pet with essential elements and minerals that are required for proper composition of bodily fluids, maintenance of healthy nerve functioning, and formation of blood and bone cells.

**Cell-Pet™** Minerals are in physical colloidal form. Colloidal particles are minute and negatively-charged. Because most bodily fluids (like blood and lymph) are colloidal, your Pet's bodily systems perceive **Cell-Pet™** as normal healthy body fluid, and allow these micro-nutrients to pass immediately through the sensitive tissues of your Pet's mouth, throat and oesophagus into the blood stream. They are then transported to all parts of your Pet, at cellular level.

Our proprietary *Micro-Activated™ Delivery System*, and *Electroculture™ Technology*, which are used in formulating and ionically bonding **Cell-Pet™**, ensure that over 95% of the nutrients are immediately absorbed into your Pet's blood stream. By thus bypassing the digestive system, nutrients are rapidly available for assimilation by all parts of the body.

Furthermore, the electromagnetic energy released by the production of nascent hydrogen boosts your Pet's immune system significantly.

☉ The *splitting of water molecules* is a proprietary technology that was patented by Everett L. Storey, the genius and inventor of Cell-Pet™ and other amazing products.

Everett Storey was a physical chemist and microbiologist, to whom Albert Einstein gave recognition for his unique and revolutionary work with oxygen and hydrogen molecules.

#### Chemical and Biological Levels:

**Cell-Pet™** Oxygen (from *splitting of water molecules* ☉) is used in the production of metabolic energy, and for oxidizing toxins and metabolic body waste for effective elimination.

**Cell-Pet™** Hydrogen (from *splitting of water molecules* ☉) is used for irrigating, building and strengthening cells and organs, preventing inflammation, moistening lung surfaces for gas diffusion, and regulating body temperature.

**Cell-Pet™** Amino Acids build proteins, hormones, neurotransmitters and anti-bodies, building your Pet's immune system for resisting viral, bacterial and fungal infections.

**Cell-Pet™** Enzymes enhance the digestive and metabolic functions of your Pet, enabling it to assimilate more nutritional benefits, than previously, from the foods that it eats.

### What else does Cell-Pet™ do?

When your Pet initially drinks water mixed with **Cell-Pet™**, it may experience some form of *detoxification* such as increased frequency in urination, loose bowel movements, mild irritability, and various mucous discharges, accompanied by a loss of appetite and energy.

Because **Cell-Pet™** supplies your Pet with the essential elements that it needs, its bodily systems strengthen and can more easily eliminate waste, acids and toxins that have been accumulating in its body for some time, creating breeding grounds for harmful micro-organisms.

So, it is important for your Pet to go through this *cleansing*, which lasts only from 1 - 7 days. Afterwards, your Pet will experience an improved level of vitality and well-being.

This type of *cleansing* might happen periodically as your Pet's bodily functions strengthen, and should not be mistaken as the onset of sickness. During periods of cleansing, ensure that your Pet has enough drinking water, is kept warm, and is encouraged to rest.

### How do I give Cell-Pet™ to my Pet?

**Directions:** Establish the average amount of water your Pet drinks per day (Daily Water Intake). If other animals drink from the same bowl, establish average amount of water drunk by all of them. Use table below to calculate appropriate number of drops of **Cell-Pet™**, and mix into drinking water to super-energize it.

Daily Water Intake	Number of drops of Cell-Pet™			
	Days 1 & 2	Days 3 & 4	Days 5 & 6	Ongoing Daily
250ml	1	1	2	3
500ml	1	2	2	3
1 litre	2	3	4	6

**Other Water:** Remove all other drinking water.

**Water Quality:** If water contains impurities or chlorine, double **Cell-Pet™** drops to purify water. Ideally, mix appropriate **Cell-Pet™** drops in water and let it stand overnight (or a few hours). Then, add same number of **Cell-Pet™** drops to water, and give it to your Pet.

**Maintenance Application:** When your Pet is very healthy, **Cell-Pet™** can be gradually reduced to the level as per Days 3 & 4. Never reduce below this level.

**Undrunk Water:** Each morning, discard any remaining undrunk water and make a new mixture for your Pet.

### Is Cell-Pet™ a medicine?

**Cell-Pet™** is not a medicine. As a nutritional supplement, it provides your Pet with a constant stream of essential building blocks (e.g. oxygen, minerals, etc.) so that its systems can optimally carry out their functions of energising, cleansing, building, balancing and protecting living tissue every day.

**Disease Conditions:** If your Pet suddenly shows signs of getting sick, double existing number of drops of **Cell-Pet™** being added to its water at the time, to boost your Pet's ability to resist disease.

Alternatively, syringe mixture of 4 drops of **Cell-Pet™** to 20 ml distilled water directly into your Pet's mouth twice daily.

An animal cannot overdose on **Cell-Pet™**. Its bodily systems will simply eliminate any unused excess.

Oxygen For Life SA (Pty) Ltd and Deutrel Industries Inc. USA make no medical claims or otherwise for the treatment, prevention, cure or mitigation of disease. If your Pet has a medical condition, we recommend you consult a Veterinarian.

### Cell-Pet™ and Cellfood®

**Cell-Pet™** is the animal equivalent of **Cellfood®**, the nutritional supplement (for humans).

**Cell-Pet™** differs from **Cellfood®** through the use of non-human grade, animal-grade minerals and excluding nutrients that are non-essential to animals.

### What ingredients does Cell-Pet™ contain?

**Cell-Pet™** is a registered blend of natural plant-sourced minerals, nutrients and electrolytes in ionic colloidal suspension, and proprietary elements that supply controlled nascent oxygen and hydrogen at cellular level. All ingredients are organic and totally non-toxic. They are cryogenically, not chemically, extracted to ensure maximum pureness and potency. No alcohol or glucose is used in the product. **Cell-Pet™** is also hypo-allergenic.

**Cell-Pet™** can be taken in conjunction with other remedies, medications and additives because it increases their bio-availability and effectiveness.

### Precautions

For animal use only. Keep bottle away from children. Avoid contact with natural organic and petroleum based materials (e.g. silk, cotton, linen, wool). Contains enzymes that may break down these organic materials.

Keep away from cellphone, computer, refrigerator, microwave oven, and any electrical appliance emitting electromagnetic current that may reduce its potency.
